SUMMARY

Dedicated Salesforce Developer and recent B.Tech IT graduate with an Expeditioner rank on Trailhead (62 Badges, 5 Superbadges). Successfully graduated from the 'Journey to Salesforce' (J2S) program, possessing hands-on expertise in custom development (Apex), process automation (Flows), and frontend architecture (LWC). Combines strong web development skills (React.js, JavaScript) with database management (PHP, MySQL) to build scalable, automated CRM solutions. Actively seeking an entry-level role to solve complex technical challenges in a dynamic Salesforce team.

EDUCATION

Bachelor of Technology in Information Technology,

Samrat Ashok Technological Institute (SATI), Vidisha

Graduated: May 2026

SKILLS

Salesforce Ecosystem: Apex Programming, Lightning Web Components (LWC), Salesforce Flows, Triggers, SOQL & SOSL, Security & Data Modeling.

Salesforce Tools & DevOps: VS Code, Salesforce CLI (SFDX), Developer Console, Data Loader.

Web Technologies: JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, PHP.

Databases & Core: MySQL, SQL (Complex Queries, Joins), Object-Oriented Programming (OOP), Git/GitHub.

PROJECTS

Salesforce CRM Customization (2026) — Configured and customized Salesforce applications utilizing modern UI components (LWC) and advanced data security models. Troubleshot user access issues and optimized system performance for scalable business requirements. [Salesforce Trailhead](#)

Automated Business Process System (2026) — Designed and deployed complex Record-Triggered Flows to automate repetitive business operations without writing custom code. Architected a scalable data model with optimized object relationships, and configured role-based access control (Profiles, Permission Sets) to ensure system security. [Salesforce Trailhead](#)

Synapse-code / Code Tutor Landing Page (2025) — Designed and developed a modern, responsive landing page using **React 19** and **Tailwind CSS**. Focused on clean UI, fast performance, and mobile-first design with reusable components and optimized layouts. [GitHub LiveDemo](#)

Employee Task Allotment (2026) — Developed comprehensive web-based application using PHP and MySQL for efficient backend database management. Built interactive admin dashboards to track records, manage resources, and streamline daily administrative operations. [GitHub](#)

SOFT SKILLS

- Problem – Solving & Analytical Thinking
- Time Management & Task Prioritization

Achievements & Certifications

- **Journey to Salesforce (J2S) Graduate:** Successfully completed the official Salesforce developer training program.
- **Trailhead Expeditioner:** Achieved 62 Badges and 5 Superbadges (including Apex Callouts, Web Services & Flows).
